

Our estate is located on the slopes of Ensérune, where vines have been cultivated since antiquity, benefiting from a singular climate between the Cévennes and the Mediterranean.

This terroir is ancient, but we strive to produce contemporary wines from a vine culture that is attentive to biodiversity. Half of the estate is dedicated to a preserved nature of garrigue and Mediterranean forest. Our estate is certified High Environmental Value. We make wines that express their terroir, the grape varieties that bear them, vinified with great care, expressive on the fruit, fresh and silky. It is with pleasure that we welcome you to the estate and wish you a pleasant visit!

A singular signature

More suppleness and less tannins for a pleasure from the first mouth without the need to keep to appreciate it.

A more immediate expression of the aromas favouring the sensation of fruit not masked by a sometimes too invasive maturing process.

A search for freshness of impression more than power of impression

An ability to adapt to situations and times of consumption: with friends, as an aperitif, around a buffet, during a meal.
